

AGC: AUTOMATED GUIDED CART

ONE CART. INFINITE POSSIBILITIES.

Complete Automation Resource has been in business since 2010 with combined 200+ years of industry experience, we offer products that will suit your needs and scale with your business. The automated guided carts offered by Complete Automation Resource are simple to integrate and completely customizable, all at a comfortable price point.

FEATURES:

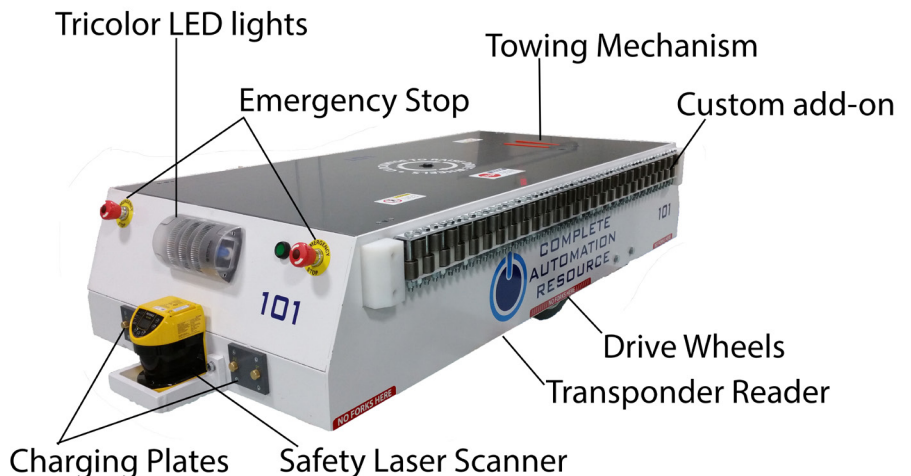

Low Profile: Designed to “tunnel” under any “backpack” to tow them from underneath and help you conserve floor space.

Safe: Safety laser scanners on the front and back detect obstacles and avoid collisions. With central traffic control and collision avoidance detection your carts stay safe on the floor.

Affordable: With off-the-shelf components your carts are easy and cost effective to maintain.

Simple: Ignition software provides a user-friendly interface that can integrate with any existing platform. Non-invasive magnetic tape paths with RFID transponder location simplify installation and customization.

Hands-Off: Automatic charging via opportunity charging or mandatory scheduled charging allows for 24/7 hands-off operation that can last up to 8 hours.

Increase your material handling efficiency with Complete Automation Resources automated guided carts. This system is easy to integrate into any established platforms.
